

NHS Supply Chain

The NHS Supply Chain & PROACT

PROACT have been working with NHS Supply Chain for many years and now have more products available via the NHS Supply Chain catalogue than ever before.

They aim to deliver value and cost savings to the NHS and can offer benefits such as:

- **Convenient ordering** – their online ordering system allows you to order all of your products quickly and easily
- **E-commerce and consolidated invoicing** – end-to-end electronic transaction capability helps you to reduce purchasing and operational costs
- **Reliability** – Their service level is consistently above 98%* and the majority of products are available for delivery within two days of ordering

*Calculated by NHS Supply Chain figures of percentage number of lines supplied in full against lines requisitioned over the last five years.

In order to make it as easy as possible for you to order from the NHS Supply Chain catalogue, we have compiled a list of the NPC codes relating to our products on the following pages.

These include:

Pulse Oximetry

Patient Assessment

Blood Pressure Monitoring

Thermometry

Airway Management

Breathing Filters

Anaesthetic Equipment

This list was up to date at the time of going to print but more products are being added all the time. Please visit our website to download the most current list or call our Customer Service team for specific items that you are looking for.
